

JANUARY 2013

WARNING TIME IS RUNNING OUT

The CRITICAL date is April 1st when the biggest changes take effect! If your exploration work requires a Plan or Permit they must be in place for April 1st.

As of November 1st a lot of changes have occurred to the Mining Act Regulations! All being said my opinion is most of the changes to the Regulations are good but as explorers we need to know the changes.

- **Georeferencing:** This is basically a gift from the assessment office! On a practical basis the requirement to get UTM co-ordinates of your claims is going to be important when we go to a Map Selection or Map Staking. Claims need to be properly portrayed on the maps going forward by following the guidelines from the Ministry website you can get \$400 assessment per claim. One year of assessment for some GPS readings and a photo. A great deal in most cases if the claims are accessible. If you have issues finding your posts use best efforts to determine the location. If you have a claim line that is present but no post estimate where the post is! If you have questions about Georeferencing call the Mining Recorder and ask (1.888.415.9845).
- **Extensions:** The Ministry has moved to streamline the extension system to make it easier internally. The down side is that special extensions (a little used system) now cost the same as regular extensions. Though this is a price increase, this is probably fair as they were free before!
- **Mining Act Awareness Program:** This new computer based training course is needed if you are going to apply for a Plan or Permit or supervise an exploration program. The course is easy and can take less than 45 minutes to complete on line. It gives you a good understanding of the changes to the Mining Act and Regulations and some practical ideas of completing exploration in Ontario.
- **Plans:** A new system of notification has been placed into effect November 1st and mandatory April 1st. Plans are required for any work above basic prospecting and geological mapping. Georeferencing does not need a Plan. First Nations consultation is not required at the Plan level but is recommended. It is supposed to take 30 days to get a Plan.

The 30 day clock starts after the Ministry “circulates” the documents to the First Nations communities whose Traditional Lands the work is being completed on. Plans are good for 2 years from the date circulated. Visit <http://www.mndm.gov.on.ca/en/mines-and-minerals/applications> to get the required documentation for Plans.

- Permits: The Permit system is setup to inform First Nations communities of exploration greater in impact then that covered in Plans. A Permit is to be issued within 50 days of the circulation date and be valid for 3 years. Visit <http://www.mndm.gov.on.ca/en/mines-and-minerals/applications> to get the required documentation for Permits.

There are other changes that can be reviewed on the Ministry Website.

Announcement: Assistant Deputy Minister Mines and Minerals Division

By George Ross, Deputy Minister

I am pleased to announce that Cindy Blancher-Smith was the successful candidate for the permanent position of Assistant Deputy Minister for the Mines and Minerals Division.

Cindy assumed the role of Assistant Deputy Minister for the Mines and Minerals Division in May 2012 on an interim basis. She has been responsible for leading the ministry’s Mines and Minerals Division, which comprises of the Mining Act Modernization Secretariat, Ontario Geological Survey, Mineral Development and Lands Branch, Aboriginal Relations Branch and the Diamond Sector Unit.

In her previous role as the Director of Mines for the province of Ontario, Cindy played an important role in working with stakeholder groups, including major international mining groups, Aboriginal peoples, industry associations and other governments. She directed the regulatory side of the ministry’s Mines and Minerals Division, which included administering the province’s Mining Act to encourage, promote and facilitate economic development in Ontario’s mineral resources sector in an environmentally responsible and sustainable manner.

Cindy has held a number of progressively responsible positions during a long career with the OPS and greatly values teamwork.

NEW DIRECTOR, MINERAL DEVELOPMENT and LANDS BRANCH

Announced by Cindy Blancher-Smith, Assistant Deputy Minister

I am pleased to announce the appointment of Gordon MacKay to the position of Director, Mineral Development and Lands Branch, with the Ministry’s Mines and Minerals Division.

Gordon recently completed a Center for Leadership executive recruitment process and was recognized for his leadership and mineral sector expertise. He has held a number of senior positions with the Governments of BC and Nunavut, and is presently the Assistant Deputy Minister, Economic Development for Nunavut. Gordon holds a Bachelor of Science in Geology from the University of British Columbia and is a Professional Geoscientist with the Association of Professional Engineers and Geoscientists of British Columbia.

Since 1998, he has been instrumental in developing Nunavut's mineral policy, leading the development of the Nunavut mineral exploration and mining strategy, working extensively with the Nunavut Land Claims Agreement and he has been involved with Inuit organizations and the federal government in the development of legislation related to surface rights, water use, environmental assessment and land use planning. Gordon will be located at the Willet Green Miller Centre in Sudbury and will be commencing work effective January 21st, 2013. Please join me in welcoming Gordon to the Ministry and to Ontario.

I would also like to take this opportunity to again extend my thanks and sincere appreciation to Rob Ferguson and Rob Merwin who both served as Director, MDLB during my transition from that role.

BAD NEWS

Wabauskang First Nation Heads to Court Over Rubicon Mineral's Phoenix Gold Mine Project in Red Lake December 17, 2012

Wabauskang First Nation has instructed its lawyers to file a lawsuit at the Ontario Superior Court of Justice opposing Rubicon Mineral's proposed Phoenix Gold Mine project in Red Lake, Ontario.

"This has been an extremely frustrating process for our First Nation from day one," said Wabauskang Chief Leslie Cameron. "Despite our concerns that the entire process review was deeply flawed, Rubicon refused to withdraw its mine application last fall and Ontario approved it over our objections. We didn't want to go to court, so even though we don't think Ontario had the authority to approve the mine, we tried to work with the company over the last year to resolve our concerns. We've been unsuccessful, so we're forced to go to court to ensure that our interests are protected."

Relying on last year's court win by the Grassy Narrows First Nation in *Keewatin*, Wabauskang has consistently taken the position that only Canada, not Ontario, can justify an infringement of its Treaty rights. Wabauskang has also repeatedly complained to both Ontario and the federal government that constitutional obligations to consult and accommodate have been wrongly delegated to mining companies. Both Ontario and Canada have ignored Wabauskang's concerns.

“Our Treaty relationship is with Canada,” said Chief Cameron. “The federal government stands by and lets Ontario delegate consultation to mining companies, such as Rubicon, who then say they aren’t responsible. Government has to deal with us directly. They can’t hide behind mining companies.”

Chief Cameron added that until Wabauskang’s rights and interests are respected, Wabauskang will actively oppose all of Rubicon’s activities in Treaty 3 lands. “On Rubicon’s website, they claim their project is low risk given their great track record with First Nations. Nothing could be farther from the truth. They don’t have Wabauskang’s support. We’ll oppose them every way possible. As far as we’re concerned, we’re in a similar position that Wahgoshig First Nation is in with Solid Gold Resources. Ontario and Canada have to realize that First Nations in Ontario aren’t going to take this anymore. Government has to fulfill their obligations directly with First Nations.”

GOOD NEWS

Foundation enters into an amending agreement in relation to the Memorandum of Understanding between the Waghoshig First Nation ("WFN") & Sheltered Oak Resources Corp. ("OAK") - Foundation increases offer to acquire 100% of the outstanding shares of Solid Gold Resources("SLD")

VANCOUVER, BRITISH COLUMBIA--(Marketwire - Jan. 8, 2013) - Foundation Resources Inc. (TSX VENTURE:FDN)(FRANKFURT:52F) (CUSIP: #350476107) ("Foundation" or "the Company") is pleased to announce that further to the Company's press release dated November, 14, 2012, the Waghoshig First Nation ("WFN") has agreed to amend its Memorandum of Understanding (MOU) with Sheltered Oak Resources Corp. allowing Foundation to become a party to the agreement upon the completion of the acquisition of OAK. The agreement is limited to the Kerrs Property, which is also in Lake Abitibi area of Ontario, but does serve as a basic starting point for future negotiations between the parties.

"While this is agreement relates to the Kerrs Property, it contains what most knowledgeable industry participants would consider standard terms, and we believe it demonstrates a desire by WFN to work with mineral exploration companies on mutually respectful terms," stated Barry Girling Interim CEO of Foundation. *"Robert Hanson, Chairman of OAK and I had what can only be described as a very productive meeting with Chief David Babin and we look forward to continuing the strong relationship that has existed between OAK and WFN."*

The Company has also increased its offer to acquire 100% of the outstanding shares Solid Gold Resources Inc. ("SLD") on the basis of one share of Foundation for each share of SLD (the "FDN Offer") up from its previous offer of 0.8333 shares of Foundation for each share of SLD (**see press release dated November 27, 2012**). The proposed terms of the FDN Offer represents a premium of approximately 45% to the 10 day SLD VWAP price of 0.031 per share for the period December 20, 2012 through

January 7, 2013. MGI Securities Inc. ("MGI") is acting as financial advisor to the Company with respect to the FDN Offer.

Foundation believes that the transaction would result in operational synergies that will benefit both companies' shareholders by creating a mid-tier Ontario gold Exploration Company and greater shareholder value and liquidity. The combined companies will result in a larger market capitalization and be more attractive to a broader base of institutional investors.

On behalf of the Board of Directors

Barry Girling, Interim CEO & Director

OPA CARIBOU COMMENTS CARIBOU BEST MANAGEMENT PRACTICES

The MNR have developed an idea for Best Management Practices (BMP) for Caribou Habitat for early exploration. These concepts have been set with consultation with Ministry of Northern Development and Mines staff. We have had major changes of the Mining Act in recent years. The BMP for early exploration attempts to cover:

- Various ground and air surveys
- Limited stripping and trenching
- Limited sampling
- Diamond drilling and;
- Limited bulk sampling

In reviewing the suggested BMP there are comments:

The key component for all these points is to get the caribou habitat tied to the claim maps and Plans and Permits system! Mineral potential needs to be completed on all areas of caribou habitat and displayed on the CLAIMaps system so all explorers know that there is potential caribou influence in the mining cycle.

1. Survey Lines: The specific nature of cut lines is to create line of sight, straight lines so that accurate locations and spacing of readings can be acquired. The use of flagging can be used in certain cases but is not possible in all situations. It is felt that lines usually have natural re-vegetation fairly quickly.
2. Surveys (Wire Placement): The placing of survey wires last less than a few days usually less than a full day. Therefore this is an easy fit.
3. Aerial Surveys: Altering or avoiding flights during sensitive periods for caribou is always possible. Flight altitudes and spacing are critical to quality of data. A good map of sensitive areas and MNR monitoring the plans and permit system would solve some of this potential conflict.
4. Trail Planning: Trails for drilling are usually started from logging roads. If logging

roads are in existence then caribou habitat should have already been taken into account. If there are no roads then helicopter access is usual not affecting habitat. The solution is to have the habitat on maps readily available to explorers and have MNR inform explorers they are in caribou habitat!

5. Drilling/Blasting: The blasting piece is not a real issue. The number of blasting sites would probably be better addressed under advance exploration. Drilling should not be an issue unless in the specific areas during critical times! An assessment of these critical areas versus mineral potential should be completed so as to create an influence map. If the areas are critical the assessment of mineral potential would determine risk for explorers.
6. Stripping/Trenching: Dominantly stripping and trenching are mechanically completed which means road access. Therefore there is probably disturbance of habitat by forestry already.

The OPA would like to continue dialogue with the MNR on Caribou but feels that there needs to be better co-ordination with the Ministry of Northern Development and Mines!

2012 Ontario Exploration & Geoscience Symposium (OEGS) - Sudbury

I would like to thank the participants, exhibitors, speakers and volunteers who helped create another excellent event! The OEGS in Sudbury moved to a new venue this year. We had comments on the new venue that were dominantly positive and have already booked the dates for next year!

This year's OEGS winners - Congratulations!

Early Registration: Bill Barclay

Lanyard Return: Michel Houlé

Mark your calendars for the 2013 OEGS - November 5th and 6th, 2013.

2013 Northwestern Ontario Mines & Minerals Symposium
"Advancing Towards Production"
April 2 & 3, 2013

2013 Northeastern Ontario Mines & Minerals Symposium
"Bush Planes and Prospectors: A Common Heritage"
April 16 & 17, 2013

Delegate Registration, Exhibit Registration and Sponsor Forms are attached to this Explorationist Newsletter. We hope to see you there!

To all our valued clients,

As most of you know, MNDM staff were relocated following the flooding of our suite in the basement of 435 James St. South last May. I would like to provide you with an update regarding our imminent move back into our newly renovated office space.

We will start moving back files back into our high-density storage file room during the week of **Monday, January 28th**. Access to hard-copy assessment files and publications will be temporarily suspended during this time.

We will disconnect our current phone and data lines on **Friday, February 1st**, and begin moving office equipment, furniture and files. Please bear in mind that although we will do our best to maintain telephone and computer service during this transition, there may be short-term disruptions in our connectivity. We hope to be back up and running and providing business as usual on **Monday, February 4th**.

We appreciate your patience and understanding during the next couple of weeks as we ready ourselves to move and then settle back into our suite. We look forward to continuing to provide you with high-quality service and products.

Mark C. Smyk, Regional Manager Northwest
Resident Geologist Program, Ministry of Northern Development and Mines
Mines and Minerals Division, Ontario Geological Survey
Suite B002, 435 James Street South, Thunder Bay, ON P7E 6S7

NORTHWESTERN ONTARIO PROSPECTORS ASSOCIATION

ANNUAL AWARDS

Nominations are requested for the following awards to be presented at the Awards Dinner in April 2013 at the Northwestern Ontario Mines & Minerals Symposium in Thunder Bay:

1. The **Lifetime Achievement Award** is presented to someone based on their cumulative work, discoveries, options and contributions to the prospecting, exploration and mining community of Northwestern Ontario.
2. The **"Bernie Schnieders" Discovery of the Year Award** recognizes an exceptional discovery in Northwestern Ontario during the previous calendar year, may involve more than one individual or company.
3. The **Developer of the Year Award** recognizes an outstanding Northwestern Ontario developer or development during the previous calendar year.
4. The **"Dan Calvert" Distinguished Service Award** recognizes an individual who has provided exceptional service to NWOPA and/or the prospecting, exploration and mining community of Northwestern Ontario.

Please contact one of the following by February 8, 2013 with your nominations:

Mark O'Brien	807-475-1106
Don Hoy	807-683-7595
John Halet	807-475-4142

Walking With a Heart of Gold: Engaging First Peoples in a Spirit of Sharing and Respect

William A. Allen, Heritage One
Guest Speaker

Northeastern Ontario Mines and Minerals Symposium
Sault Ste. Marie, Ontario
April 16, 2013

Abstract:

In light of treaty and inherent rights affirmed in the courts and new requirements under Ontario's Mining Act First Peoples now are playing a more prominent part in mineral exploration and the mining development process. This presentation will investigate ways which increase the chances of success in reaching accord between explorationists who undertake work on traditional lands and the First Peoples whose ancestors have a long history on that land. Focus will be placed on establishing and nurturing positive relationships. Ways of respectfully seeking permission, stepping back, giving thanks and leaving a gift will be explored. Pitfalls will be identified. In determining the nature of sharing the land and its mineral wealth the importance of relationship, shared experience on the land, storytelling and traditional language will be highlighted. The presentation will be liberally sprinkled with stories, First Peoples' perspectives, historical foundations and visual images. Explorationists are uniquely positioned to ensure that their work provides for the full involvement of and understanding of First Peoples, not just through compliance with regulatory requirements, but through sincere commitment to Canada's fundamental moral imperative. That imperative is Canada's absolute necessity to respect First Peoples and to include them meaningfully as the wealth of the land is shared.

Background - W.A. Allen

- Born in Thessalon
- Lived in Algoma until 1969 (Thessalon 2 yrs, Bruce Mines 5 yrs, Sault 20 yrs)
- Until 1969 in family business in Christmas trees and nursery trees on St. Joseph Island
- Since 1970 has lived in Burk's Falls near Algonquin Park
- 35 year career in education, including 27 years as a School Principal and School Board Co-ordinator of Continuing Education
- Guidance and Counselling specialist
- Spent summers in various studies in Canada, United States, Europe with focus on environmental science and government policy development
- Lifelong interest in Indigenous cultures on different continents
- Took early retirement in 1997, last 16 years researching and doing field work on history of First Nations, the watersheds of their traditional territories, relationship features

- Holds Ontario avocation archaeology licence; as archaeologist address similar regulatory and First Peoples' expectations for breaking the ground as experienced by prospectors
- Interested in ancient First Nations quarrying, copper processing and tool making
- Interested in waterpower energy issues – Ontario, Quebec, Grand Coulee, New Zealand etc. and energy relationship to mining interests
- Inaugural member of Society for Energy and the Environment Development Studies at University of Alberta, at Tar Sands by 1980
- Public speaker at various universities in Ontario, New York, Illinois, California and other venues such as National Parks Service, Minnesota and numerous cities in Ontario and British Columbia
- Long time member of Cultural Advisory Circle, Georgian Bay Islands National Park
- Contributor and featured on cover of Ontario's Forest Management Guide for Cultural Heritage Values
- Author (solely, on writing teams and as editor) re education, preserving Aboriginal heritage, protected places, endangered fish species, archaeology
- Co-author of Ontario's Recovery Strategy for American Eel
- Researcher, helicopter flight path consultant and on camera personality in 5 TVO documentary films in the past decade

A new television documentary in which Mr. Allen has been involved with will be screened just before the symposium. The initial episode on **TVO** will be at **7:00 p.m.** on **Tuesday, March 26**. This is an opportunity to see him before the symposium. The series is called "**The Land Between**". The series deals with more than mining but there is coverage of both limestone quarries east of Lake Simcoe, an open pit mine and the history of the Marmora Iron Works. For those who can't wait for the live TV showing there are some brief film clips featuring him from the series at the following online sites.

SPONSORSHIP OPPORTUNITIES

In support of the Sault & District Prospectors Association
Northeastern Ontario Mines & Minerals Symposium
“Bush Planes and Prospectors: A Common Heritage”
April 16 & 17, 2013

The SDPA is seeking sponsors for the presentation of the Northeastern Ontario Mines and Minerals Symposium. We are asking for your support in order to ensure the success of this event.

All Symposium Supporters receive the following benefits: Your name on the Symposium Page of the Sault and District Prospectors Association and the Ontario Prospectors Association websites with recognition of sponsorship level, listing as a Sponsor on the Symposium Program, and listing on the Sponsor Poster Board at the event. Supporters may include items for the delegate bags. For Diamond Sponsor Level your logo will be placed on the Delegate Bags.

When forwarding your sponsorship we ask that you send us your logo in jpg format to oeqs@ontarioprospectors.com

Please make your sponsorship donation payable to "Sault & District Prospectors Association". Your sponsorship request should be forwarded to Susan Warren, Special Projects Administrator, Ontario Prospectors Association, 1000 Alloy Drive, Thunder Bay, ON P7B 6A5 If you have any questions or need further details please contact Susan or Garry at 866-259-3727 or via email at oeqs@ontarioprospectors.com

Sponsor Level	Amount	Selection
