NTI's Uranium Mining Policy

GUIDING PRINCIPLE

Uranium exploration and mining must be carried out in an environmentally and socially responsible way and the uranium that results from the mining shall be used only for peaceful and environmentally friendly purposes.

OBJECTIVES

The objectives of NTI's uranium mining policy are to:

1. Support Responsible and Peaceful Uses of Nuclear Energy
   Nuclear energy will be used for peaceful and environmentally responsible purposes.

2. Require Benefits from Uranium Exploration and Mining
   Uranium exploration and mining in Nunavut will bring significant economic benefits to Inuit.

3. Ensure Protection of Human Health
   Uranium exploration and mining will be carried out in a manner that protects the health and safety of the workers and of all Nunavummiut.

4. Limit Impacts of Uranium Exploration and Mining
   Uranium exploration and mining will be carried out in a manner that will not cause significant adverse effects on people, the environment or wildlife.

5. Promote Participation of Inuit
   Inuit of affected communities will be given an opportunity for full and meaningful participation in both the environmental assessment process and the operations of a uranium mining project.

Partner with NTI

BRITESPAN Building Systems has you covered! Based in Ontario, Canada, BRITESPAN Building Systems is a premier Canadian manufacturer and distributor of fabric covered buildings. With over 17 years experience in the fabric building industry, we have supplied and constructed over 5,000 fabric covered structures for several different applications including mining, municipal, aggregate, warehousing and agricultural. We have constructed buildings as small as 19’w x 30’l to and as large as 160’w x 937’l.

Our product offers ranges in widths from 19’ – 160’ too any length required. Custom widths and designs are available for special applications. Our free span design allows for optimal storage space. Some of our building models can achieve an interior 50’ height in the centre of the building. This allows for trucks to enter the building and dump directly inside, eliminating time and labour moving materials in and out of the building. Also, the fabric cover provides great lighting and eliminates the need for costly electrical installations and operation. This creates a safe working environment for your employees. The building seems bright even on a cloudy day!

Our buildings can be customized to meet specific requirements including special door requirements, conveyor systems, internal liners, insulating heating and more. The unique design of our structures allows for cost effective and reduced installation times. Many different foundations can be used including poured walls, sea containers, cement blocks, floating slabs and grade beams. Most buildings can be easily relocated or we can extend the building if required.

CSA/A660 certified, BRITESPAN Buildings are engineered to meet and exceed the site specific wind, snow and rain loads. BRITESPAN Building Systems can help you with your fabric covered building project from start to finish. Our qualified dealers and building consultants have years of experience and can recommend the right building solution for your building needs.

BRITESPAN CAN CONSULT WITH YOU REGARDING:
- Foundations
- Cover Replacements
- Capacity calculations
- Bid Specifications
- Dismantling Buildings
- Service or repairs
- Yearly maintenance inspections

To get started on your next building project contact BRITESPAN Building System today.

For information, visit us online at www.britespanbuildings.com
2013 EXPLORATION OUTLOOK

The Ontario Prospectors Association (OPA) is looking toward 2013 as a comeback year for the early exploration sector. The commodity prices are still high and the demand on Canadian commodities is still strong. A quick look around Ontario shows there are numerous advanced projects moving toward production or expanding production.

Another interesting trend is the merger and acquisitions of interesting projects by various companies allowing these to be financed and moved forward. Good examples of this are the acquisitions of Coventry Ventures of gold projects in the Cameron Lake-Rainy Lake area, Osisko of the Brett Resources Hammond Reef project, Stillwater of the Marathon PGM project, Cliffs of the Freewest Chromite projects in Ring of Fire, Argonaut Gold in the Wawa area, Iamgold of Trelawney’s Cote Lake and Osisko of Queenston; to name a few!

The Mines and Minerals Directory is a valuable source of data for explorers, suppliers and job searchers. The OPA is pleased to have Naylor publish this document for our members. We would also thank the Ontario Ministry of Northern Development and Mines and the advertisers within the magazine for their support in completing the magazine.

Please join us at our Symposia being held in Ontario.

2013 Ontario Exploration & Geoscience Symposium November 5 & 6, United Steelworkers Hall Local 6500, Sudbury.

For more information on the Symposia please visit www.ontarioprospectors.com

Minister’s Message

Ministry of Northern Development and Mines

Ontario a Premier Mining Jurisdiction

January 2013

Mineral developers know that Ontario is one of the premier mineral investment jurisdictions in the world, which is why they have made it Canada’s leader in mineral exploration. Our province accounted for 21 per cent of the country’s non-fuel mineral production in 2011 with a value of about $10.7 billion. In 2011, exploration spending in the province reached a record $1 billion and it will be close to that again in 2012. It is expected that about 25 per cent of all exploration and mineral deposit appraisal dollars invested in Canada will be spent here.

Investing in mineral exploration and development in Ontario pays off. Ontario ranks among the top 10 world producers of platinum, nickel and cobalt, and among the top 20 producers of gold, silver, copper and zinc. We are also part of a select group of jurisdictions that produce, process and market diamonds. Moreover, our mining sector employs about 27,000 people directly and another 50,000 indirectly. Many communities, particularly in Northern Ontario, thrive on mining activity. With this in mind, the Government of Ontario is focusing on helping the mining industry open at least eight new mines over the next 10 years. Three mines have opened recently. In fact, over the last decade, more mines opened here in Ontario than anywhere else in Canada. With 42 mines currently operating in the province, we are the nation’s largest producer of non-fuel minerals and a global mining force.

In our view, the best is yet to come. Exciting discoveries in the Ring of Fire area in Northern Ontario hold the promise of Canada’s first world-class chromite deposit along with strong potential for nickel, copper, zinc, gold and other deposits. In consultation with First Nations, we look forward to unlocking its potential and creating thousands of jobs in the North.

Our government is committed to advancing mineral development for the benefit of all Ontarians. To that end, in consultation with stakeholders, we are modernizing elements of our Mining Act, and developing regulations that promote sustainable mineral activity that respects the environment, Aboriginal and treaty rights, communities and individuals. With balanced and equitable guidelines, the modernized Mining Act is bringing greater clarity and certainty for the mining industry. Furthermore, we continue investing in important services such as geological mapping and the digitization of geoscience information to help Ontario’s mineral exploration sector identify new mineral deposits.

Our superior mineral endowment supports a dynamic mining sector, rich with knowledge and expertise that has flourished for more than a century. With exciting new mineral discoveries and our government’s commitment to promoting sustainable mineral development, we look forward to a bright future for mineral development in the province.

In the first quarter of 2013, Detour Gold will start gold production at its Detour Lake open-pit mine near Cochrane, northeastern Ontario, Canada. With a projected average annual production of +650,000 ounces of gold over more than 20 years, Detour Lake will be among the largest gold mining operations in North America.

Geo Data Solutions Inc. (GDS) offers a wide range of geophysical and geochemical services for resource exploration and environmental assessment. GDS specializes in fixed-wing and helicopter borne geophysical surveys, geochemical sampling and data processing, GDS can also provide exhaustive data interpretation.

GDS's senior personnel own decades of experience in providing exploration services worldwide. Regular clients include international organizations, governmental agencies, and major/junior exploration companies.

GDS combines this broad and deep experience over hundreds of projects with state-of-the-art field equipment to acquire the best-possible data even in the most challenging conditions. Professional geoscientists based at Laval data-processing centre follow the highest international standards to produce timely and reliable maps and reports. This newly built data-processing center covers more than 6500 square foot.

Large-scale aeromagnetic surveying is the most popular service provided by GDS. These surveys often are part of national programmes of geological and structural mapping.

Gamma-ray spectrometry is a frequent adjunct to the aeromagnetic surveying. Potassium, thorium and uranium signals aid in inferring geology, and can be of primary importance in the exploration for nuclear fuels, disseminated base/precious-metals, and rare-earth elements. Gravity surveying is also a significant service offer by GDS.

Over rugged terrain, GDS fly similar surveys using helicopter platforms. A combination of electromagnetic, magnetic and gamma-ray spectrometric methods can then be flown simultaneously in order to optimize mobilization and data acquisition costs. Data interpretation results get from the aggregation of several geophysical techniques represent a clear gain in identifying potential exploration targets. Again, logistical expertise and operational efficiency allow GDS to deliver exceptional results throughout this range of services.

Since 2007, GDS has executed most of the aircraft-supported geochemical surveys flown in eastern Canada, along with extensive aeromagnetic surveys in northern Canada, regional helicopterborne surveys in the Canadian cordillera and over 11,000 line-km of airborne gravity survey. In total, GDS acquired over 1 million line-km of magnetic/radiometric/electromagnetic/gravity survey and gathered more than 23,000 lake-bottom sediment samples.

GDS builds its surveying systems with components that have the highest market sensitivity and reliability. Aeromagnetic systems incorporate Geometrics or Scintrex Cs-vapor magnetometers and RMS compensators. For gamma-ray spectrometric surveys, GDS uses Radiation Solutions spectrometers which are considered by the geophysicist community as the best instrument available on the market. For electromagnetic surveys, GDS uses a proprietary system (ProspectEM) characterized by a compact transmitter, for better manoeuvrability over rough terrain, with a strong dipolar moment allowing exploration depth of about 200 m.

GDS maintains its systems, develops new technology and processes large-volumes of survey data to final form at its head office in Laval. GDS uses Geosoft for final processing and map-making, and has large-format color plotters for hard-copy requirements.

GDS attributes its ability to grow during challenging times to the orientation of its personnel to survey operations. Senior personnel remain directly involved in survey planning and support, creating a field environment that enables GDS to attract and retain the most skilled and productive operators. The safety record of GDS is among the best in the industry.

GDS responds to the airborne survey requirements of its customers by assembling the best systems and crews for data acquisition and processing. The productivity of its equipment and personnel enable GDS to provide excellent results at competitive prices.

</tr>
</tbody>
</table>

### Notes

- The Dome mine should remain open until 2013, engineering and geology personnel will continue aggressively evaluate additional areas to develop and extend the mine’s life beyond that date.
- Gold production for all Porcupine mines was 273,100 ounces in 2011 and is expected to be 265,000 ounces in 2012.
- Production at the $75 million Hollinger open pit project will commence in early 2013 pending the receipt of permits.
Holloway-Holt Mine

St Andrew Goldfields Ltd.
• gold producer
• underground

Address: Highway 101 East, Box 609
Matheson, ON P0K 1N0
Tel: (705) 567-4862
Fax: (705) 567-4863

Website: www.sasgoldmines.com

Mine Manager: Duncan Middlemiss

Production Rate: Holloway Mine: 700 tonnes per day
Holt Mine: 1,000 tonnes per day

Production
- Holloway Mine: 2009 – 18,838 ounces of gold
  2010 – 57,459 ounces of gold
  2011 – 21,462 ounces of gold
  2012 – 21,629 ounces of gold
  2013 – 30,000 ounces of gold (estimated)
- Holt Mine: 2010 – 2,022 ounces of gold
  2011 – 32,376 ounces of gold
  2012 – 50,445 ounces of gold
  2013 – 50,000 ounces of gold (estimated)

Reserves
- Holloway Mine: 223,000 tonnes grading 4.3 g/t for
  1,140,132 ounces of gold (proven and probable – Dec/2011)
- Holt Mine: 2,408,000 tonnes grading 5.36 g/t Au containing 414,966
  ounces of gold (proven and probable - Dec/2011)

Opened
- Holloway Mine: 2009
- Holt Mine: 2010

Employment
- Holloway Mine: 116
- Holt Mine: 168

Notes
- Most of the production at the Holloway mine is from the Smoke Deep zone. All of Holloway’s production in the third quarter of 2012 (5,408 ounces of gold) came from Smoke Deep zone.
- At the Taylor Project, the Company aims to complete a second bulk sample area by the 4th quarter 2013 and begin production in 2014. The Mineral Reserve Estimate for the Taylor Project is 985,000 tonnes grading 5.45 g/t for 173,000 contained ounces of gold.

Hislop Mine

St Andrew Goldfields Ltd.
• gold producer
• open pit

Address: Highway 101 East, PO Box 609, RR 2
Matheson, ON P0K 1N0
Tel: (705) 567-4862
Fax: (705) 567-4863

Website: www.sasgoldmines.com

Mine Manager: Duncan Middlemiss

Production Rate: 1,300 tonnes per day

Production
- 2010 – 10,839 ounces of gold
- 2011 – 20,184 ounces of gold
- 2012 – 23,530 ounces of gold
- 2013 – 20,000 ounces of gold (estimated)

Reserves
- 1,534,000 tonnes grading 1.88 g/t
  Au containing 93,000 ounces of gold (proven and probable - Dec/2011)

Opened: 2010

Employment
- 50 contractors

Notes
- Mining has commenced from the eastern portion of the pit where overburden was removed at the end of 2011. Hislop had a stockpile of 37,000 tonnes grading 1.4 g/t in Dec/2012.
- An extensive body of known and probable mineral reserves exists along the Lynn Lake Greenstone Belt. Lynn Lake welcomes new investors to stake claims and develop the area’s high mineral potential, or review current exploration program results. The time is now; the resources are here. Come and tap into the region’s precious base metal deposits.

<td>Commercial production began at the Mishie Mine on January 1, 2012. A 200 meter strip of mineralization has been identified to the east of the existing pit. Wesdome plans to complete mine planning, initiate stripping to confirm continuity, initiate permitting amendments for expansion and incorporate this area into the mine plan and mineral reserves.</td>
</tr>
</tbody>
</table>
### Musselwhite Mine

**Goldcorp Inc.**
- gold producer
- underground

| Address | PO Box 7500  
|         | Thunder Bay, ON P7B 6S8  
|         | Tel: (807) 928-2200 
|         | Fax: (807) 925-2067  
| Website | www.goldcorp.com  
| Mine Manager | Gil Lawson  
| Production Rate | 4,500 tonnes per day  
| Production | 2009 – 232,600 ounces of gold  
|             | 2010 – 258,700 ounces of gold  
|             | 2011 – 242,600 ounces of gold  
|             | 2012 – 239,200 ounces of gold  
|             | 2013 – 255,000 ounces of gold (forecast)  
| Reserves | 11.29 million tonnes at 6.28 g/t containing 2.28 million ounces of gold (proven and probable - Dec/2011)  
| Opened | 1997  
| Employment | 855 (including contractors)  
| Notes | Musselwhite mine has produced over three million ounces of gold. The 2010 discovery of the Lynx zone has created the potential to significantly enhance economics and extend productive mine life. The mine life is 13 years. The increase in production in 2012 is the result of higher grades at the PQ Deep Zone. Exploration drilling continues on the Lynx zone. |

### Timmins West Mine

**Lake Shore Gold Corp.**
- gold producer
- underground, open pit

| Address | 1515 Government Road South  
|         | Timmins, ON P4R 1N4  
|         | Tel: (705) 269-4344 
|         | Fax: (705) 268-1794  
| Website | www.lsgold.com  
| Mine Manager | Danny Battiston  
| Production Rate | 2,500 tonnes per day  
| Production | 2010 – 46,800 ounces of gold  
|             | 2011 – 83,585 ounces of gold  
|             | 2012 – 150,000 ounces of gold (guidance)  
| Reserves | 5,826,000 tonnes at 5.99 g/t containing 1,122,500 ounces of gold (measured and indicated) and 4,272,000 tonnes at 5.76 g/t containing 791,500 ounces of gold (inferred)  
| Opened | 2011  
| Employment | 285  
| Notes | Commercial Production was declared effective January 1, 2011. Production is fed to the Bell Creek Mill. Mill expansion to 3,000 tonnes per day should be achieved in 2013. |

### Red Lake Gold Mine

**Goldcorp Inc.**
- gold producer
- underground

| Address | 17 Mine Road, Bag 2000  
|         | Balmertown, ON P0V 1C0  
|         | Tel: (807) 735-2077 
|         | Fax: (807) 735-2765  
| Website | www.goldcorp.com  
| Mine Manager | Chris Cormier, Mine General Manager  
| Production Rate | 3,100 tonnes per day  
| Production | 2009 – 622,700 ounces of gold  
|             | 2010 – 703,300 ounces of gold  
|             | 2011 – 622,000 ounces of gold  
|             | 2012 – 507,500 ounces of gold  
|             | 2013 – 492,500 ounces of gold (forecast)  
| Reserves | 11.4 million tonnes at 10.78 grams per tonne containing 3.95 million ounces of gold (proven and probable - Dec/2011)  
| Opened | 1948  
| Employment | 1280 (including contractors)  
| Notes | Red Lake is Goldcorp’s top producer, yielding in excess of 500,000 ounces annually at very low cash costs. The richest area at Red Lake is the High Grade Zone which operates at more than two ounces of gold per tonne. Development of the Cochenour project is advancing toward gold production in the first half of 2015. |

### Young-Davidson Mine

**AuRico Gold Inc.**
- gold producer
- open pit

| Address | PO Box 187  
|         | Matachewan, ON P0K 1M0  
|         | Tel: (705) 565-9800 
|         | Fax: (705) 565-2387  
| Website | www.auricogold.com  
| Mine Manager | Luc Guimond, General Manager  
| Production Rate | 6,000 tonnes per day  
| Production | 2012 – 56,000 ounces of gold (preliminary)  
|             | 2013 – 130,000 ounces of gold (guidance)  
| Reserves | 46.6 million tonnes grading 2.6 g/t for 3,831,504 ounces of gold (proven and probable - Dec/2011)  
| Opened | 2011  
| Employment | 285  
| Notes | In late 2013, the company plans to develop the YD West target and establish an underground drilling platform to better explore both the main deposit and the YD West target below the 9,000 mL. Production at the mine is expected to ramp-up to over 250,000 ounces in 2016. |
Other Metal Mines

### Kidd Creek Mine

**Xstrata Plc.**
- Zinc, copper, lead, silver, cadmium, indium, sulphuric acid
- Underground

**Address**
11335 Highway 655 North, PO Bag 2002
Timmins, ON P4N 7K1
Tel: (705) 264-5200
Fax: (705) 267-8709

**Website**

**Mine Manager**
Shannon Campbell

**Production Rate**
6,500 tonnes/day

**Production**
- 2009 – 43,620 tonnes copper, 112,693 tonnes zinc
- 2010 – 42,322 tonnes copper, 61,947 tonnes zinc
- 2011 – 34,400 tonnes copper, 68,100 tonnes zinc
- 2012 – 38,400 tonnes copper, 63,200 tonnes zinc

**Reserves**
15.5 millions tonnes at 1.85% copper, 5% zinc, 0.17% lead and 58 g/t silver (proven and probable – Dec/2011)

**Opened**
1966

**Employment**
1,100 employees and 165 contractors

**Notes**
Xstrata Copper recently expanded the mine operations to a depth 9,600 feet, which will prolong the mine life to 2018.

### Lac des Iles Mine

**North American Palladium Ltd.**
- Platinum group metals
- Open pit
- Underground

**Address**
PO Box 10547
Thunder Bay, ON, P7B 6T9
Tel: (807) 448-2000
Fax: (807) 448-2001

**Website**
www.nap.com

**Mine Manager**
Brad Corrigan

**Production Rate**
2,600 tpd from underground
(moving to 5,500 by 2015)

**Production**
- 2009 – No commercial production
- 2010 – 15,000 tonnes per day (mill capacity)
- 2011 – 161,845 ounces of palladium (preliminary)

**Reserves**
1.14 million tonnes @ 3.61 g/t palladium, 0.29 g/t platinum, 0.26 g/t gold, 0.09 g/t copper, 0.10% nickel (proven – Mar/2012)

**Opened**
Production from the open pit in 1993, from underground in 2006

**Employment**
Over 600 employees and contractors

**Notes**
One of only two primary palladium mines in the world. The primary deposits on the property are the Roby Zone and the Offset Zone, both palladium deposits with some platinum, gold, nickel, and copper by-products. NAP will be expanding and transitioning to shaft mining in 2013. The mine expansion will allow the Company to extend mine life by at least 7 years.

---

**Levack Mine**

**KGHM International Ltd.**
- Nickel, copper, platinum and palladium
- Underground

**Address**
4 Mine Road, PO Box 40
Levack, ON P0M 2C0
Tel: (705) 966-3021
Fax: (416) 360-0550

**Website**
www.kghminternational.com

**Mine Manager**
Mike Garbutt

**Production Rate**
700 tonnes per day

**Production**
- 2009 – 454 tonnes nickel, 292 tonnes copper, 1,000 ounces of precious metals
- 2010 – 2,267 tonnes nickel, 2,267 tonnes copper, 32,000 ounces of precious metals
- 2011 – 17,100 tonnes copper, 3,765 tonnes nickel, 30,000 ounces of precious metals

**Reserves**
0.9 million tonnes ore average 8.3% copper, 1.6% nickel and 0.6 grams per tonne PGMs and 0.8 g/t gold (Dec 31, 2010)

**Opened**
2007

**Employment**
210

**Notes**
Production from the Morrison deposit was included for the full year in 2011 which increased copper production significantly. The Company signed an agreement with Xstrata for the use of the workings of the Craig mine to improve the haulage distance, improve operating efficiencies and it will allow them to test other targets. KGHM acquired Levack as part of a takeover of Quadra FNX Mining Ltd. in Mar/2012.

Production
2009 – 43,600 tonnes nickel, 42,000 tonnes copper, 27,700 ounces of precious metals
2010 – 39,000 tonnes copper, 32,000 tonnes nickel, 27,700 ounces of precious metals
2011 – 35,000 tonnes nickel, 32,000 tonnes copper, 24,800 ounces of precious metals
2012 – 30,000 tonnes copper, 23,000 tonnes nickel, 17,000 ounces of precious metals

Reserves
105.4 million tonnes averaging 1.2% nickel, 1.5% copper, 0.8 g/t platinum, 1.1 g/t palladium, 0.4 g/t gold, 0.04% cobalt

Opened
2008

Employment
Approximately 3,900 people working in Vale’s Sudbury operations.

Notes
The Totten mine is expected to begin commercial production in 2013.

<td>Xstrata Nickel’s Sudbury operations consist of two underground mines, a mill and a smelter. Nickel and copper are the primary metals and cobalt, precious metals, gold, silver, platinum and palladium are also produced. Mine construction on the Fraser Morgan project is underway and production should commence in 2013. The mine plan is to produce approximately 6,000 tonnes of nickel per annum for 6 years and utilise spare capacity at the Fraser complex and Strathcona mill.</td>

Condor focuses on all aspects of airborne geophysics as it relates to the search for mineral resources. In 2011, Condor has added the ability to provide commercial processing and analysis of ZTEM Afmag data. Given the newness of the ZTEM technique to the industry, Condor has generated a series of case studies and a tutorial on ZTEM (ZTEM Primer) so as to aid our clients in the best use of this exciting technique.

Biodisk Corp. provides package sewage treatment plant for camps of mining industry and remote areas. There are 19 different sizes that can meet your requirement of wastewater treatment solutions. The complete system is engineered in 40 or 20 foot container that has the advantages of a small footprint, low energy requirements, easy offloading and installation, and 24hr/365d operation. It is truly a turnkey solution.

Contact: Tom Smith, rbcguy@biodisk.ca; Nancy Liao, nancy@biodisk.ca; Tel: 416-503-4100; www.BIODISK.ca

Address: 426 Royal York Road, Toronto Canada M8Y 2R9

TIMMINS PORCUPINE WEST PROPERTY, ONTARIO
- 13 km from downtown Timmins
- Property consists of 188 claims over 3200 ha
- Property is 2.5 km, NE of LSG West Timmins Mine
- Model: Hollinger McIntyre Gold System
- Grey Wolf Zone: 30.6 g/tonne over 4.0 meters
  • 8.45 g/tonne over 5.5 meters
  • 9.22 g/tonne over 11.0 meters
- 43-101 Resource: 212,600 oz Indicated at 4.83 g/t
  • 814,800 oz Inferred at 3.56 g/t

EASTFORD LAKE PROPERTY, ONTARIO
- 70 km northeast of the City of Timmins, ON
- Property consists of 170 claims over 3140 ha
- 400 m wide shear Zone Corridor
- 9 Mineralized Shear Zones Identified
- Major Fault through shear zones NNE to SSW
- Lynx Gold Zone: 16.6 g/tonne over 12 meters
  • 45.45 g/tonne over 3.3 meters
  • 142.26 g/tonne over 3.0 meters
- Diamond Drilling to test model

Northern College’s Haileybury School of Mines has been in the business of training mining specialists for over 100 years, setting standard for mining education in Canada and throughout the world.

Our flexible programs prime students to succeed and lead in mining and related industries.

Our Apprenticeship, Community and Corporate Training (ACCT) division works directly with employers to develop customized training solutions for a powerful workforce.

Along with a full complement of trades and technology and ACCT programming, Northern College offers:
- Mining Engineering Technician
- Motive Power Technician - Heavy Equipment
- Mechanical Technician - Industrial Millwright
- Instrumentation Engineering Technician
- Basic Underground Hard Rock Miner,
  Surface Miner and Surface Diamond Driller
  Assistant and Mill Process Operator
  Common Core programs

To learn more about our programs and how Northern College can give you a competitive advantage in the mining industry, visit northern.on.ca.
Atlas Copco Exploration Products

Innovating for long-term performance.

We stand by our responsibilities towards our customers, towards the environment and the people around us. We make performance stand the test of time. This is what we call – Sustainable Productivity.
