Congratulations Blaine Webster!

Blaine has been a tireless advocate for mining exploration in Ontario for over 30 years.

In 1983, Blaine founded JVX Ltd., which continues to provide geophysical exploration and consulting services for companies

throughout Ontario, across Canada, and around the world.

Later in the 1980's Blaine staked claims near Sandy Lake, Ontario and formed Goldeye Explorations Ltd. Goldeye went on to stake claims in Tyrrell township in the Shining Tree area and became a TSX Venture listed junior explorer.

Through years and years of effort Blaine has continued to advance Goldeye's properties, and in the process, committed significant money and resources to the economy of Northern Ontario. Blaine may be comfortable on Bay St., but his methods are derived from a true appreciation of geology and understanding of the important role of local prospecting.

Blaine continues to be a strong voice for exploration in Ontario and looks forward to the days when Shining Tree and Sandy Lake will be major mining camps.
